Currency Settings@

This article applies to:

Pro Max

Use the billing currency setting to select the currency format and symbol that your customers see. When your customer makes a payment, the currency format and symbol will match the currency they are being charged in.

1. Click on your user avatar and choose Settings

2. Click Sales settings

	Payment processing and currency Set up payment processing and set currency options.
	Set up payment processing and set currency options.
\$	Sales settings Payment processors, currency options, sales taxes, and tax settir
☺	Integrations Connect your other business apps and tools for a more seamless

3. Select the desired currency from the drop down

Currency settings		
This is the currency the application will use for all billing, Currency US Dollar [USD]	payments and invoices.
