This article applies to:

Keap mobile update: Bring over your own number with porting

Already have a business phone number you love? Now, you can port it over and get all the advantages of Keap Business Line, including Notes, Tasks, enhanced text message features, and more. See if your number is eligible. We'll walk you through the process. [Learn more](#)

Landing Pages update: New text editor toolbar

Give your font some extra flair with the new text editor toolbar in our Landing Page builder. Highlight any text on your page and the toolbar will display right where you're working. Change text colors, backgrounds, or use rich text formatting like **bold**, <u>underline</u>, and even ~~strikethrough~~. [Learn more.](#)

Campaigns update: New "Add to sequence" process

With the new Add to sequence option, you can drop a contact into a campaign, and let them skip the line. Instead of making a contact start from the beginning, you can now add them to a sequence further ahead in the campaign. [Learn more.](#)

Bug fixes

- A contact opening a single email could trigger multiple email open goals if the campaign was created by copying another campaign. ([Known Issue 2059194](#))
- In the Campaign Builder's "Set field value" process, the text for some longer custom fields wrapped around and obscured the field value. ([Known Issue 2059885](#))
- After creating a custom field during a contact import, the field name was not displayed in the Keap fields drop-down until revisiting the page or completing the import. ([Known Issue 2047601](#))
- On the Broadcasts page, scheduled broadcasts were not being displayed when the "Scheduled" filter was selected. Instead, these broadcasts were listed when the "Sent" filter was selected. ([Known Issue 2052355](#))
