This article applies to:

## Deal closed automation

Pro and Max users can trigger an Easy automation when a deal is closed (Won or Lost), in the Pipeline and have an Easy automation stop when a deal is closed. Learn more

## Checkout form automation

In Easy automations, you now have the option to trigger the automation to start when a checkout form is paid. You can select when any form is paid or select a specific checkout form. Learn more

## Bug fixes

- If a button in the new email builder was not configured to apply a tag when clicked, the button link would not work.

- Phone and fax type drop down field options were duplicated on a landing page form.

- If you included quotes in the name of a new email in an advanced automation sequence, a block of code would show instead of the email builder when opening the email to edit.

- When importing new contacts, email statuses were set to Non-marketable when indicating permission to market to those contacts was selected.
