This article applies to:

1. Facebook & Google Analytics

2. Custom domains validation

3. Mobile navigation update

4. Bug fixes

Facebook & Google Analytics

Easily add a Facebook Pixel ID or a Google Analytics Tracking ID to landing pages to better understand landing page performance outside of the Advanced Automation metrics. Learn more

Custom domains validation

Enjoy increased confidence with setting up a custom domain on a landing page with status validation. Learn more

Mobile navigation update

This update provides a greater understanding of where you are in the application. Each view will show the area you are in plus the view name. Learn more

Bug fixes

- Some Stripe 3D Secure orders were showing unpaid when the payment showed successful in Stripe.
